

M.EIC, 2022-23

Large Scale Software Development

Filipe Correia, Daniel Pinho, João Pedro Dias

Setting up GitHub

- Your TP class professor will give you access to a GitHub organization
- Create a board (GitHub calls them “projects”) on your GitHub organization.
- Configure your new board with the custom fields:
 - **Sprint** (two-week sprints, starting on the first day of Sprint 1)
 - **Effort** (will be used to estimate using story points)
 - **Team** (“single select” field, with four values: *T1*, *T2*, *T3* and *T4*)
- Create at least one repository in your organization named after your project.
 - Use the repository template available in moodle.
 - We may sometimes refer to this repository as your *main repository*.
 - You may end up creating other repositories in your organization.
 - All repositories that you create should be set as *private*.

Project Board

Project board + New view

Filter by keyword or by field

Product Backlog 2

Draft ...

Administrators need a way to block misbehaving users, so that well-behaved users can continue to use the system.

Draft

Users need a way to authenticate in the system, so that they are uniquely identifiable within the product.

Sprint Backlog 1

main-template #3

Aeronautical Doctors need to search for Flight Professionals using various fields, so that they can easily find and access their information.

🔍 Sprint 1 8 T1

In Progress 2

main-template #1

Aeronautical Doctors need to upload medical exams to a Flight Professional's profile, so that they can later lookup the historic record of all performed exams.

🔍 Sprint 1 5 T1 user story

main-template #2

The logout link is not logging out the user.

🔍 Sprint 1 T1 bug

Done 0

See the GitHub organization template at <https://github.com/FEUP-MEIC-DS-2022>
